

DANIEL BARBOSA

BACK-END DEVELOPER

Currently, I am focusing on learning C#, with an emphasis on game development. Although I started my journey with Java (approximately 8 months of study), I am expanding my knowledge into areas such as web and software development using C#. I have practical experience with Java, C#, HTML, CSS, and also with the Linux operating system, which provides me with a solid foundation to explore different areas of software development.

EDUCATION

Oficina Indie(studying)

- C#
- Unity

Cruzeiro do Sul University

- Bachelor's Degree in Computer Science -
Rio de Janeiro, Brazil/ 2024-2027
